Home Menu

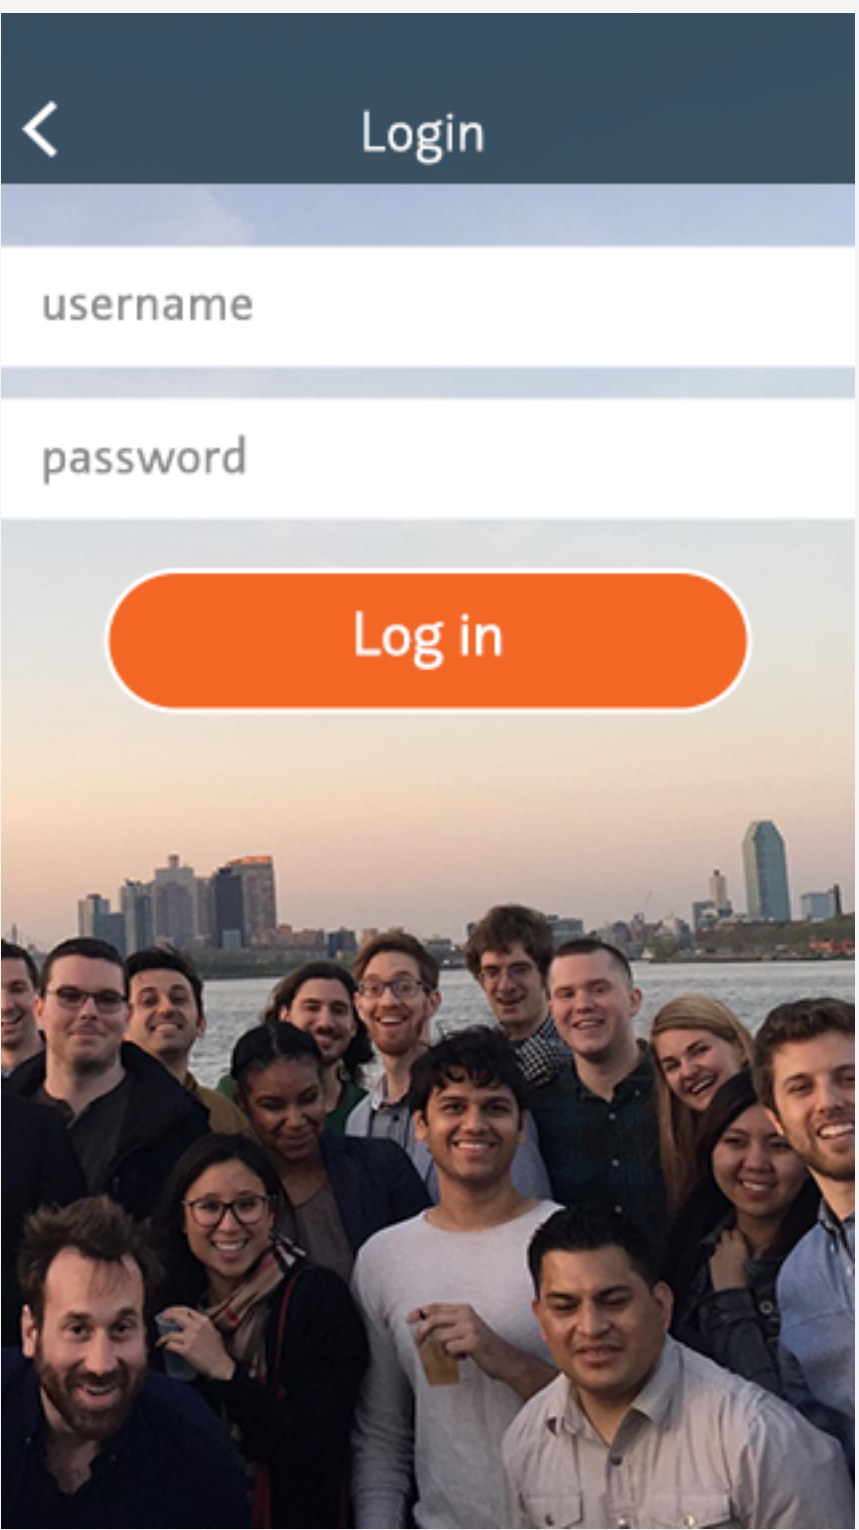

Chat

Load the JSON file 'TableSection/JSON/chatData.json' and display the chat messages in the TableView

Login

1. Send an asynchronous POST request to <http://dev3.apppartner.com/AppPartnerDeveloperTest/scripts/login.php>
2. The POST request must contain the parameters 'username' and 'password'
3. You will receive a JSON response back with a 'code' and a 'message'
4. Display the parsed code and message in a UIAlert along with how long the api call took in miliseconds
5. The only valid login is username AppPartner, password qwerty
6. When a login is successful, tapping 'OK' on the UIAlert should bring us back to the MainMenuViewController

Fonts

Header Text	Machinato Light 20, #ffffff
Chat - User Name	Machinato Regular 18, #252525
Chat - Message	Machinato Regular 15, #111111
Login Placeholder	Machinato Regular 18, #898989
Login Input	Machinato Regular 18, #111111
Button	Machinato Regular 22, #ffffff

Colors

Header Background	#2c4556, 90% opacity
-------------------	----------------------

Layout

Status Bar height	20pt
Navigation bar height	44pt
left and right margins	16pt

Animation Test

Animate the App Partner icon. Make it spin around 360 degrees when the Spin button is pressed. Allow it to be dragged around the screen by touching and dragging.

Bonus points for creativity!
